

UN G20

MetMUNC XLVIII

Welcome Letter

Chairpeople: Ben Yacht, Emily Soffer & Tannaz Latifi

Distinguished Delegates,

It is our immense pleasure that we welcome you to the G20 committee of MetMUNC XLVIII. G20 is a committee comprised of the 19 leading world powers and the European Union with the goals of furthering global economic progress. This committee will be run similarly to the 2019 G20 conference in Japan and similar topics will be discussed.

My name is Ben Yacht and I am a junior here at Plainview. This is my third year in Model UN and my second time being a chair. Last year I chaired the Historical Committee that revolved around Renaissance Italian City States. I am also proud to be a delegate trainer for METMUNC so I can inspire the next generation of debaters! Outside of MetMUNC I am on the school varsity winter and spring track teams as well as in Science and Spanish Honor Society, and Science Olympiads. I am also part of the Science Research Program at school and want to be a neurologist when I am older. I can't wait to see you all and hear all of your stances and ideas!

My name is Emily Soffer. I am a senior and this is my fourth year being a part of model UN. This is my first time being a chair! Outside of MUN I am the proud president of POBJFK's chapter of Science Honors Society along with playing the trombone in our high school band and orchestra. My hobbies include swimming and listening to music, although all I seem to have time for right now is college applications and preparing for this conference! I am so excited to chair this committee and watch all of you debate!

My name is Tannaz Latifi. I am a junior and this is my second year being a part of Model UN. This is also my first time being a chair, and I am so excited to be working with you all. Outside of MetMUNC, I participate on the school varsity winter and spring track teams and in Science Olympiads. On weekends, I also volunteer at a dental office and take part in the Wantagh Levittown Ambulance Corps. I am very eager to hear all of your thoughts and positions!

In this committee you will be discussing the topics of **Energy Efficiency, Free Trade Agreements, and Regulation of Cryptocurrency**. Even though this is only a one day conference, we encourage thorough research on all of the topics to help facilitate good debate. We advise that you base your research around the questions to consider at the end of each background guide. Happy researching and we will see you all soon!

Your Honorable Chairs,

Ben Yacht

Emily Soffer

Tanaaz Latifi
